WORK & EXPERIENCE

Technical Support, AOL / Yahoo – CGS Romania

December 2024 - Present

- Helping users through the platform Salesforce to fix and enhance their experience through email support.
- Helped thousands of users with their account issues, handled account security and compromise cases, and provided solutions to technical problems. Collaborated with cross-functional teams to improve support processes and enhance user satisfaction.
- Overall QA Score: over 99% quality over a span of almost 2 years

Specialty practice, Roweb development, Pitești

July 2023 - August 2023

- Studied and practiced Web Development in the Second Year of Bachelors.

Endava4students Course

October 2023 - February 2024

- Learning about Web Development Technologies and practices, Java fundamentals, PostgreSQL, HTML, CSS, JavaScript, React.

EDUCATION

Masters - Internet Technologies (in English) - University of Brașov

October 2024 - July 2026

- Focused on various web systems: web development, testing, database administration.
- Thesis project: „Auto Service: An AI-Powered Automotive Service Platform for Romanian Markets.”

Bachelors - Computer Science - University Centre of Pitești

October 2021 - July 2024

- Specialized in core software engineering, databases, and web technologies. Thesis project: „AutoService v1”.

PERSONAL PROJECTS

cloud.stnsc.net

[Link to Github Repo](#), [Link to website \(cloud.stnsc.net\)](#)

- Developed a full-stack cloud storage application using React, TypeScript, and Cloudflare Workers, with R2 object storage and a D1 SQL database. Implemented user authentication, multipart file uploads, storage quotas, and file downloads through a REST API.
- Built an interactive file explorer with nested folders, drag-and-drop file organization, image previews, and transfer progress tracking.
- *Technologies: Vite, React, TypeScript, Framer Motion, Cloudflare Workers, D1, R2*

Auto Service (v2)

[Link to Github Repo](#), [Link to website \(auto-service.app\)](#)

- Project made for my master's thesis.
- Expanded on the bachelor's project based on the same idea, but now developed as a much more advanced and modernized version. New design, AI was added for fast car diagnosing, backend made entirely with AWS.
- *Technologies: React Native, TypeScript, Expo SDK, Vercel, Cloudflare, API AI Layers, AWS (Cognito, DynamoDB, SES, SNS), i18n*

Personal Website (2nd iteration) – stnsc.net

[Link](#)

- My current platform shows my portfolio in a fancy way.
- *Technologies: Vite, React, TypeScript, Framer Motion*

Digital Hourglass

[Link](#)

- Master’s Project, a robotics prototype that simulates sand falling by using LED’s and a Gyroscope sensor, plus Bluetooth for IoT purposes.
- *Technologies: Arduino, Virtuino for IoT*

SKILLS

Advanced: HTML, CSS, JavaScript, TypeScript, React & React Native, TailwindCSS, Bootstrap

Intermediate: Java, OOP, Node.js, Figma, Cloudflare

Beginner: Python, C++, C#, Arduino, Java Spring

Extra Knowledge in: MS Office, Adobe After Effects, Adobe Premiere Pro, Adobe Photoshop, Adobe Illustrator
