WORK & EXPERIENCE

Technical Support, AOL / Yahoo – CGS Romania *December 2024 - Present*

- Helping users through the platform Salesforce to fix and enhance their experience through email support.
- Helped thousands of users with their account issues, handled account security and compromise cases, and provided solutions to technical problems. Collaborated with cross-functional teams to improve support processes and enhance user satisfaction.

Specialty practice, Roweb development, Pitești *July 2023 - August 2023*

- Studied and practiced Web Development in the Second Year of Bachelors.

Endava4students Course *October 2023 - February 2024*

- Learning about Web Development Technologies and practices, Java fundamentals, PostgreSQL, HTML, CSS, JavaScript, React.

EDUCATION

Masters - Internet Technologies (in English) - University of Braşov *October 2024 - July 2026*

- Focused on various web systems: web development, testing, database administration.
- Thesis project: „Auto Service: An AI-Powered Automotive Service Platform for Romanian Markets.”

Bachelors - Computer Science - University Centre of Pitești *October 2021 - July 2024*

- Specialized in core software engineering, databases, and web technologies. Thesis project: „AutoService v1”.

PERSONAL PROJECTS

Auto Service (v2) *[Link to Github Repo](#), [Link to website \(auto-service.app\)](#)*

- Project made for my master’s thesis.
- Expanded on the bachelor’s project mentioned below, a much more advanced and modernized version. New design, AI was added for fast car diagnosing, backend made entirely with AWS.
- *Technologies: React Native, TypeScript, Expo SDK, Vercel, Cloudflare, API AI Layers, AWS (Cognito, DynamoDB, SES, SNS), i18n*

Auto-Service (v1) *[Link](#)*

- Project made for my bachelors. It is a website system that allows managing various car service shops.
- *Technologies: React, TypeScript, Bootstrap, Express.JS, Framer Motion, PostgreSQL*

Personal Website (2nd iteration) – stnsc.net *[Link](#)*

- My current platform shows my portfolio in a fancy way.
- *Technologies: Vite, React, TypeScript, Framer Motion*

Personal Website (1st iteration) – stnsc.vercel.app *[Link](#)*

- Documenting the whole design through implementation process.
- *Technologies: Figma, Vite, React, TypeScript, TailwindCSS, AnimeJS, Hosted on Vercel*

Digital Hourglass

Link

- Master’s Project, a robotics prototype that simulates sand falling by using LED’s and a Gyroscope sensor, plus Bluetooth for IoT purposes.
- *Technologies: Arduino, Virtuino for IoT*

Weather App

Link

- Personal Project for displaying weather data from any city on earth using OpenWeatherAPI.
- *Technologies: React, TypeScript, Framer Motion, TailwindCSS*

NELENITE

Link

- Work-in-progress, a robot for the social platform Discord, of general use, focused on a video game for API calls.
- *Technologies: Javascript, Koyeb for 24/7 Hosting*

SKILLS

Advanced: HTML, CSS, JavaScript, TypeScript, React & React Native, TailwindCSS, Bootstrap

Intermediate: Java, OOP, Node.js, Figma

Beginner: Python, C++, C#, Arduino, Java Spring

Extra Knowledge in: MS Office, Adobe After Effects, Adobe Premiere Pro, Adobe Photoshop, Adobe Illustrator
